

- Axon guidance
- cell morphogenesis
- vasculature development
- regulation of plasma membrane bounded cell project
- modulation of chemical synaptic transmission
- actin cytoskeleton organization
- import into cell
- VEGFA VEGFR2 signaling
- Signaling by Receptor Tyrosine Kinases
- Yersinia infection
- regulation of GTPase activity
- enzyme-linked receptor protein signaling pathway
- VEGFR2-S1PR5-ERK1/2-PKC-alpha complex
- Endocytosis
- negative regulation of cell population proliferation
- Efferocytosis
- regulation of small GTPase mediated signal transduc
- GPCR downstream signalling
- response to toxic substance
- neuron migration
